Grade System

The performance of the students is assessed throughout the academic term using Continuous and Comprehensive Assessment, along with a University Examination at the end of each term. The marks obtained from these assessments are combined to determine the letter grade for each course, following the grade system on a scale of 10 as approved by the Board of Examinations of this University.

Grade Table

Letter Grade	Description	Grade Point
O	Outstanding	10
A+	Excellent	9
A	Very Good	8
B+	Good	7
B	Above Average	6
C	Average	5
P	Pass	4
F	Fail	0

Computation of GPA and CGPA

Grade Point Average (GPA) is the ratio of the sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student, and the sum of the number of credits of all the courses undergone by a student.

$$GPA (S_i) = \frac{\text{The sum of the product of credits and grade points for all courses in the term}}{\text{The sum of the number of credits for all courses in the term}} = \frac{\sum (C_i \times G_i)}{\sum C_i}$$

Where C_i is the number of credits of the i^{th} course, and G_i is the grade point scored by the student in the i^{th} course.

Cumulative Grade Point Average (CGPA) is also calculated in the same manner, considering all the courses undergone by a student over all the terms of the Degree Program.

$$CGPA = \frac{\text{The sum of the product of credits and grade points for all courses across all terms}}{\text{The sum of the number of credits for all courses across all terms}} = \frac{\sum (C_i \times S_i)}{\sum C_i}$$

Where S_i is the GPA of the i^{th} term and C_i is the total number of credits in that term.

The GPA and CGPA are rounded off to 2 decimal points and reported in the transcript.

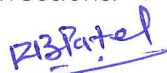

Conversion of GPA and CGPA Into Percentage

GPA and CGPA indicate the performance of the students on a 10-point scale. This system is approximately equivalent to representing the Grade Point Averages as a percentage by multiplying it by 10, resulting in a score that ranges from 0 to 100 marks.

$$\text{Term wise Percentage} = GPA (S_i) \times 10$$

$$\text{Overall Percentage} = CGPA \times 10$$
