SUMMARY

Backend-focused Software Developer with strong problem-solving skills and a solid foundation in Data Structures & Algorithms, Object-Oriented Programming, and database systems. Experienced in designing and building full-stack applications and backend services using modern technologies, with practical exposure to applying machine learning concepts in real-world projects. Recognized for developing scalable, user-focused solutions through academic projects, internships, and SSIP-selected innovation work.

EDUCATION

Adani University <i>Bachelor of Technology in Information and Communication Technology</i> CGPA: 8.88	Ahmedabad, Gujarat 2024 – 2027 (Pursuing)
B & B Institute of Technology <i>Diploma in Engineering (Information Technology)</i> CGPA: 9.73	Vallabh Vidyanagar, Gujarat 2021 – 2024
Gujarat Secondary and Higher Secondary Education Board (GSEB) <i>Secondary School Certificate (SSC)</i> Percentage: 93%	Gujarat 2019 – 2021

PROJECTS

SaralAI – Multilingual AI Assistance Platform <i>React.js, FastAPI, PostgreSQL</i> - Engineered a multilingual AI assistant using FastAPI and React.js that processes natural language queries and delivers context-aware responses, with support for 10+ Indian regional languages via Sarvam AI's Mayura v1 translation API – improving digital accessibility for non-English users. - Integrated Sarvam AI's sarvam-m LLM with wiki grounding and role-based, category-aware prompting to generate accurate, structured summaries with official references; implemented a smart text chunking system to handle API rate limits efficiently.	2025 – 2026
PyBe – Scenario-to-Code Learning Engine <i>React/TypeScript, Node.js/Express, MongoDB</i> - Engineered an AI-driven scenario-to-code learning system that converts real-world observations and programming topics into grounded programming concepts and executable code through the CKLIS reasoning pipeline. - Implemented core CKLIS reasoning workflows, multi-provider LLM orchestration, SSE-based execution streaming, canonical knowledge grounding, and five Studio output formats using React/TypeScript, Node.js/Express, and MongoDB/Mongoose. - Optimized runtime performance and contributed to the production-merged PR #69, improving the system's execution and generation workflow.	2025 – 2026 (Present)
BookMyLook – Appointment & Service Booking System <i>React.js, Node.js, MySQL</i> - Developed an appointment management system with backend scheduling logic and RESTful APIs to handle booking workflows. - Designed relational database schema to ensure efficient storage and retrieval of user and appointment data. - Built responsive frontend interfaces to deliver a smooth and intuitive booking experience.	2024 – 2025
Smart Glasses for Visually Impaired <i>Embedded Systems, Sensors</i> - Architected software logic for a wearable assistive system to enhance environmental awareness for visually impaired users. - Implemented sensor data processing to detect surroundings and trigger context-based responses. - Selected under Student Startup and Innovation Policy (SSIP) for innovation and social impact.	2023 – 2024

EXPERIENCE

AI/ML & Software Engineering Intern

25 May – 25 July 2026

Vicharanam Labs for Educational Design (VLEID), IIT Ropar

Remote

- Worked on AI/ML and software engineering initiatives involving intelligent educational systems, data-driven workflows, and AI-assisted application development.
- Applied Python, machine learning concepts, prompt engineering, and software development practices to convert problem statements into practical AI-driven solutions.
- Contributed to experimentation, system integration, and iterative improvement of AI-based workflows while collaborating in a research and innovation-oriented environment.

Web Development Intern

Sep 2022

Webial Technology Pvt. Ltd.

Vallabh Vidyanagar, Gujarat

- Developed and modified web pages using HTML, CSS, and JavaScript within a structured development workflow.
- Collaborated on frontend components and improved UI responsiveness for better user interaction.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Frontend: HTML, CSS, React.js

Backend: Node.js, FastAPI

Databases: MySQL, MongoDB

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS

AI/ML: Machine Learning, Data Preprocessing, Basic Statistics

Tools: Git, GitHub

CERTIFICATIONS & ACHIEVEMENTS

Second Rank in Diploma (Information Technology), Academic Year 2023–24

3rd Position – CREATO 2024 (State-Level Project Competition)

Deloitte – Data Analytics Virtual Experience Program (Forage), Dec 2025

Yuva AI for All – IndiaAI & NASSCOM FutureSkills Prime (Dec 2025)
